### Disturbance in the case: The Delusion Rubric.

In 2008 Liz Lalor presented a series of lectures in London, Belgium and Netherlands. On day one of the seminar Liz will offer insights into her European presentations based on her new book 'Homoeopathic Psychiatry – Understanding the Meaning and Application of the Delusion Rubrics in Case Analysis'. She reveals through the mire of words our patients are telling us – the Disturbance of the Case. She presents cases of suicide, depression cancer and a huge range of auto immune diseases; these are all emotional, mental and physical states reflective of severe disturbance. Liz does not believe you will find the simillimum in chronic disease states if you do not recognise the DISTURBANCE. Hahnemann said in the search for a homoeopathic specific remedy in Organon A 153, that we should concentrate on the “more striking, singular, uncommon and peculiar signs of the symptoms of the case.” This is not always taught or its importance emphasised.

To be able to treat chronic disease it is necessary to find the DISTURBANCE which caused the destruction. Any severe disease state is a reflection of our inner angst; deep subconscious struggles within.

Liz teaches a way of listening to a case that no other homoeopath is teaching. She concentrates on the “eye of the storm” inside the patient.

If you want to treat destructive diseases you can't afford to miss this opportunity to experience the unique approach of Liz Lalor, before she embarks on her next European lectures.

**Until you know how to find the destruction inside your patient you will not find “like cures like” or the “destruction matches destruction” core inside you patients.**

Based on the ideology of Dr Leon Vannier, Liz will update her latest research and modifications to her successful fertility program on day two. Treatment for auto immune diseases and infertility will be covered to ensure the practitioner is well equipped to apply her methods in their own clinic.

With 29 years working as an integrative natural therapist the wealth of knowledge Liz Lalor is prepared to share is valuable to homoeopathic practitioners and their practice.
